

February 14<sup>th</sup>, 2023

Dear Valued Distribution Partner,

3M removed a sticky note with instructions (see image below) applied to each 3M™ Tegaderm™ CHG Chlorhexidine Gluconate I.V. Port Dressing manufactured. Product catalog numbers include 1665 and 1665NS. Sticky notes with application instructions will no longer be applied to the dressings as of the end of December 2023.

The IFU (containing application instructions) and product application guides (print and video) will continue to be available. Although not required, an electronic version of the application instructions formerly printed on the sticky note will also be available to print or for kit makers to incorporate into their kit instruction. No other changes to the product or process of manufacturing the product are being made.

Please see the included table for additional information on the products. If you have questions, please contact your local 3M Sales Representative or the 3M Health Care Customer Helpline at 1-800-327-5380.

Sincerely,

Katie Smith, USAC Portfolio Marketing Manager  
3M Medical Solutions Division
