

## Product Description

15W USB Soldering Iron Wireless Electric Soldering Iron Type-C Interface Fast Charging Solder Iron Portable Repair Welding Tool

Features: 1.The product is compact and easy to operate, long press the button for 3 seconds to turn on/off. 2.The soldering iron tip can be replaced by unscrewing it, making it easy to operate. 3. Intelligent temperature regulation, adjustable temperature range of 200-450 °C \ 392-842 °F, to meet the needs of different scenarios. 4.Type-c interface, comes with built-in battery, worry free charging, and can be powered by usb interface. 5.The heating core and soldering iron tip are integrated, with fast heating and 10 second tinning, ensuring a long service life. 6.Wide range of applications: Suitable for circuit board repair, mobile phone repair, electronic component repair, wire welding, manual carving and painting, etc. Parameters: Product name: digital usb soldering iron (including soldering iron tip) Color: black, orange (optional) Battery: polymer battery (1100mah) Rated voltage: dc5v Working current: 2a Power interface: type-c Power: 15w Temperature range: 180-450°C \ 356-842°F (celsius/fahrenheit) Instructions 1.press and hold the power button for 3 seconds to turn on or off the device 2.single machine temperature increase button, increase by 5 °C each time, long press to quickly increase 3.the temperature increase button and temperature decrease button are both standalone, with °Cand°F conversion Package include: Package 1: Usb soldering iron (round tip)\*1 Charging cable\*1 Package 2: Usb soldering iron (round tip)\*1 Blade tip\*1 Horseshoe head\*1 Sponge\*1 Charging cable\*1 Solder wire\*1 Tool box\*1

## Photo

# Digital display soldering iron

Wireless 15W

- Support simultaneous charging and usage
- Smart Stay
- 8-second rapid heating
- 180°C~450°C

# Digital display USB soldering iron

Integrated heating core and soldering iron tip, fast heating, tinning in 10 seconds, long service life

# Intelligent temperature control

Adjustable temperature 200-450°C/392-842°F

# TYPE-C interface

Built-in battery, no worries about charging, can be powered by any USB interface

# USB soldering iron with digital display

The head of the soldering iron can be replaced, unscrewed, easy to operate.

# USB Soldering Iron

Intelligent temperature adjustment, adjustable temperature 200-450°C/392-842°F, to meet the needs of different scenarios

# Digital display soldering iron

## Wireless 15W

- Support simultaneous charging and usage
- Smart Stay
- 8-second rapid heating
- 180°C~450°C

# 8SECOND RAPID HEATING

## INTEGRATED INTERNAL HEATING ELEMENT

Accurate temperature control  
Fever quickly efficient  
Low energy consumption

DIGITAL DISPLAY SCREEN

Detected a short circuit and displayed NO flashing.

When the battery level is  $\leq 5\%$ , the screen displays LO flashing for 5 seconds and then automatically shuts down.

# INTELUIGENT CONSTANT TEMPERATURE CONTROL CONTROL SYSTEM

The sleep/shutdown function is easy to operate

  
**POWER ON/OFF**  
Press and hold the button for 3 seconds to turn on and off the device

Click the cooling button to lower the temperature by 5°C each time, long press to quickly lower it to a minimum of 180 °C

Click the heating button to increase the temperature by 5 °C each time. Long press to quickly increase the temperature, up to a maximum of 450 °C

# TYPE-C interface, convenient to use

Work anytime, anywhere

Can be connected to  
computer USB port mobile  
power

# Self-powered battery

No connection required Use while charging

USB  
Type-C

1100mAh

# Detachable soldering iron

Three professional soldering iron tips are interchangeable

# Self-powered battery

No connection required Use while charging

1100mAh

Power bank

Socket

Computer

# Suitable for various occasions

Circuit board repair, mobile phone repair, electronic component repair, circuit welding, hand engraving and painting, etc.

# Portable Soldering Iron

# Size parameters

# Portable Soldering iron

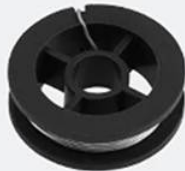

Comes with soldering iron holder

USB charging cable

146mm/5.75in

187mm/7.36in

17mm/0.67in

# Instructions for use

1. Press and hold the power button for 3 seconds to turn on or off
2. Single temperature increase button, increase by 5°C each time, long press to increase rapidly
3. Single temperature increase button and temperature decrease button at the same time, °C and °F conversion

# Product parameters

Product name: Digital display USB soldering iron (including soldering iron tip)

Color: black, orange (optional)

Battery: polymer battery (1100mah)

Rated voltage: DC5V

Working current: 2A

Power interface: TYPE-C

Power: 15W

Working temperature: 180~450°C

Temperature range: 180-450°C/356-842°F (Celsius/Fahrenheit)
