iPad and the Environment

We take responsibility for the environmental footprint of our products throughout their life cycle. [Learn more](#)

iPad Pro is designed with the following features to reduce its environmental impact:¹⁰

Made with better materials

- 100% recycled tin in the solder of the main logic board, True Tone flash, and wireless charger for Apple Pencil
- Enclosure made with recyclable, low-carbon aluminum
- 35% or more recycled plastic in multiple components

Smarter chemistry

- Arsenic-free display glass
- Mercury-free display
- BFR-, PVC-, and beryllium-free

Green manufacturing

- Final assembly supplier sites do not generate any waste sent to landfill¹¹
- All final assembly suppliers are transitioning to 100% renewable energy for Apple production

Responsible packaging

- 100% of virgin wood fiber comes from responsibly managed forests
- Recyclable, majority-wood packaging

Energy efficient

- Meets ENERGY STAR requirements

1. Available space is less and varies due to many factors. A standard configuration uses approximately 10GB to 13GB of space (including iPadOS and preinstalled apps) depending on the model and settings. Preinstalled apps use about 4GB, and you can delete these apps and restore them. Storage capacity subject to change based on software version and may vary by device.

2. Size and weight vary by configuration and manufacturing process.

3. FaceTime calling requires a FaceTime-enabled device for the caller and recipient and a Wi-Fi connection. Availability over a cellular network depends on carrier policies; data charges may apply.

4. Data plan required. Gigabit-class LTE and Wi-Fi calling are available in select markets and through select carriers. Speeds are based on theoretical throughput and vary based on site conditions and carrier. For details on LTE support, contact your carrier and see [apple.com/ipad/LTE](#).

5. Cellular data plan is sold separately. The model you purchase is configured to work with a particular cellular network technology. Check with your carrier for compatibility and cellular data plan availability.

6. Not all carriers support Apple SIM and eSIM. See your carrier for details. Not available in China mainland.

7. Siri may not be available in all languages or in all areas, and features may vary by area. Internet access required. Cellular data charges may apply.

8. Testing conducted by Apple in February 2020 using preproduction iPad Pro 11-inch (2nd generation) and iPad Pro 12.9-inch (4th generation) units and software. Testing consisted of full battery discharge while performing each of the following tasks: video playback and internet browsing using Wi-Fi or cellular data network. Video content was a repeated 2-hour 23-minute movie purchased from the iTunes Store. Internet over Wi-Fi and cellular data network tests were conducted using dedicated web servers, browsing snapshot versions of 20 popular web pages. All settings were default except Wi-Fi was associated with a network (except for internet browsing over cellular data network); the Wi-Fi feature Ask to Join Networks and Auto-Brightness were turned off; Brightness was set to 50%; and WPA2 encryption was enabled. Specific life depends on device settings, usage, and may vary over factors. Battery tests are conducted using battery iPad units. Actual results may vary.

9. Wireless broadband recommended: fees may apply.

10. Data accurate as of product launch.

11. Final assembly supplier sites for iPad Pro are third-party certified as Zero Waste by UL LLC (UL 2799 Standard).

Some features may not be available for all countries or all areas. [View complete list.](#)
