

150W

Series

Car Inverter

DC 12V to AC 110V/220V+USB 5V

Product introduction

The product can convert DC 12V into AC 110V or 220V, 50Hz or 60Hz, and USB output is DC 5V. Rated output power of the product is 150W, which can be widely used in all kinds of electrical equipment, such as mobile phone, TV sets, fanner, digital equipment. It is the best choice for your self-drive, field work, entertainment.

Usage

First, make sure your car cigarette lighter socket output voltage is DC 12V (except medium bus and truck). Almost all the car's cigarette lighter socket output voltage is 12V. Put your electrical equipment plug into this product's output socket and maintain a good contact. Be sure of the power of your electrical equipment is below this product rated power. Put cigarette lighter socket, and then you will see the indicator lights up, which means the product can start working. If your electrical equipment has the power switch, please switch on.

Technical parameters

Input Voltage: 12V DC
Output Voltage: AC 110V or 220V 50Hz or 60Hz
USB Output: 5V 0.5A/2.1A
Power Rating :150W
Max Power: 200W
Voltage Protection: Low-voltage 10-11V
Over-voltage 15-16V
Over-Load Protection: >150W
Short-circuit Protection :Yes

Input DC: **DC12V**
Output AC: 110V 220V

Output Frequency: 50Hz 60Hz
USB Output: **5V Max 0.5A / 2.1A**

Made in China

DC 12V to AC 110V/220V+USB 5V
