

Manuel du produit

1. Product Identification

Product Name: 2-in-1 Cat Cabinet with Open Shelves (Brown)

SKU: PHO_34SJXREW

Material: Particleboard (MDF) + steel frame

Net Weight: 29.8 kg / 65.70 lb (per set)

Gross Weight: 29.8 kg / 65.70 lb (per carton)

Package Dimensions: 109 × 53.6 × 21 cm

Assembled Dimensions: 90 × 45 × 132 cm

Color: Brown (rustic wood finish)

Brand: GARVEE

HS Code: 9403609990

Suitable Regions: Global (including EU/FR market)

Special Properties: No battery, no magnet, non-hazardous, non-toxic

2. Product Overview

This brown rustic 2-in-1 cat cabinet combines a hidden cat litter enclosure with open upper shelves, designed to integrate pet care with industrial-style home storage. Constructed from durable MDF and a reinforced steel frame, it features a double-door cat house with a side entrance for easy pet access, plus three open shelves for displaying decor or organizing pet supplies. The vintage brown wood finish fits industrial and rustic home decor, while the enclosed design effectively hides the litter box and reduces odor diffusion. Assembly is required, with all necessary hardware and an installation video provided for convenient setup.

3. Technical Parameters & Specifications

Product Type: 2-in-1 cat cabinet furniture

Material: Particleboard (MDF) + steel frame

Color: Brown (rustic wood finish)

Net Weight (per set): 29.8 kg / 65.70 lb

Gross Weight (per carton): 29.8 kg / 65.70 lb

Package Size: 109 × 53.6 × 21 cm

Assembled Size: 90 × 45 × 132 cm

Structure: Double-door cat enclosure + 3 open upper shelves

Cat House Entrance: Side cutout for pet access

Packing Method: 1 set per carton

Power Supply: None (no electrical components)

Assembly Required: Yes (installation video provided separately)

4. Safety Warnings & Important Notices

4.1 General Safety Warnings

Read all instructions carefully before assembly to avoid injury. This product is intended for indoor home use only; do not use outdoors or in excessively humid environments. Keep all small parts (screws, hardware) away from children and pets to prevent choking hazards. Do not allow children to climb, stand, or sit on the open shelves, as this may cause tipping and injury. Stop use immediately if any panel is cracked, broken, or if connections become loose.

4.2 Assembly Safety

Assemble the product on a flat, stable floor to prevent tipping during setup. Use only the provided hardware and tools; do not substitute with incompatible parts. Follow the step-by-step instructions or installation video strictly to ensure structural stability. Do not over-tighten screws, as this may crack the MDF panels. Keep the product away from sharp objects or heavy impacts that may damage the surface or frame.

4.3 Usage Safety

Do not exceed the weight limit of the open shelves (max 5 kg per shelf) and cat enclosure (max 10 kg total). Place the product against a wall or use anti-tip devices to secure it, especially in households with children or active pets. Do not place hot objects (e.g., candles, heaters) near the product to avoid fire risk. Keep the product away from direct sunlight and moisture to prevent warping, discoloration, or material degradation.

4.4 Pet Safety

The cat enclosure is designed for small to medium-sized cats only; do not use for large pets or other animals. Ensure the cat house entrance is free of sharp edges to prevent injury to your pet. Clean the litter box regularly to maintain hygiene and avoid odor buildup. Do not leave your pet unsupervised during the first use to ensure they adapt safely.

5. Instructions for Use

5.1 Assembly Steps

Unpack all components and lay them out on a flat surface, checking for any damage. Follow the provided installation video or step-by-step manual to attach the steel frame to the MDF panels. Install the double doors of the cat enclosure and secure the hinges. Attach the three open shelves to the upper frame, ensuring they are level and stable. Insert the cat house base panel and check all connections for tightness.

5.2 Usage Steps

Place the assembled cat cabinet in a suitable indoor location, away from direct sunlight and moisture. Insert a cat litter box into the lower enclosure through the double doors. Use the open upper shelves to display decor, store pet supplies, or organize household items. Guide your cat to use the side entrance of the cat house for litter box access. Open the double doors regularly to clean the litter box and maintain hygiene.

5.3 Precautions

Ensure the product is placed on a flat, stable floor to prevent tipping. Do not drag or move the assembled product roughly, as this may loosen the frame or damage the panels. Keep the product away from water sources (e.g., sinks, bathtubs) to avoid warping the MDF material. Do not use the cat cabinet as a step stool or climbing structure for children.

6. Maintenance & Cleaning

6.1 Cleaning

Wipe the surface with a soft, dry cloth after each use to remove dust and pet hair. For stubborn stains or spills, use a damp cloth with a small amount of mild detergent; avoid using abrasive cleaners or strong chemicals (e.g., bleach, alcohol) that may damage the brown rustic finish. Dry the surface thoroughly after cleaning to prevent moisture buildup. Clean the cat enclosure regularly with a pet-safe disinfectant to maintain hygiene and reduce odor.

6.2 Maintenance

Regularly inspect all screws, hinges, and connections for looseness; tighten them as needed to ensure structural stability. Check the MDF panels for cracks, warping, or discoloration; replace

damaged parts immediately. Lubricate the door hinges with a small amount of silicone lubricant if they become stiff, to ensure smooth operation. Avoid exposing the product to extreme temperatures (below 0° C or above 40° C) to prevent material degradation. Store the product in a dry, cool place when not in use for an extended period.
