

LED 1

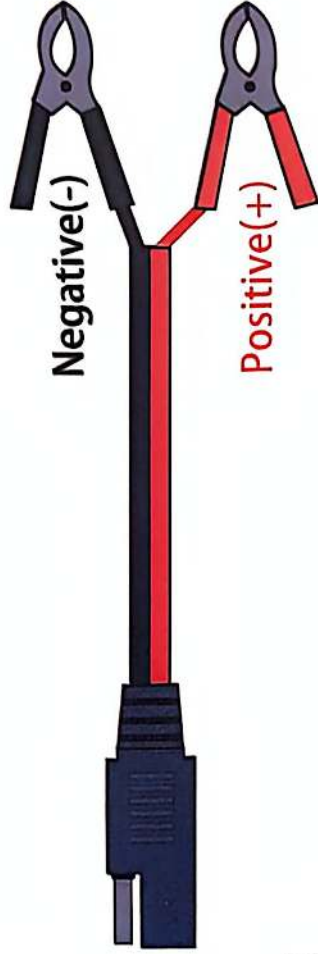

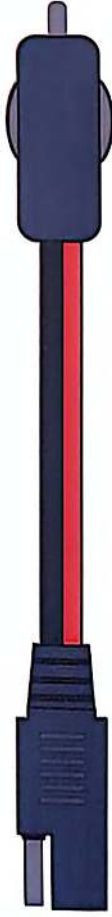

Connect the battery to light up

LED 2

Battery full light

LED 3

Solar energy works

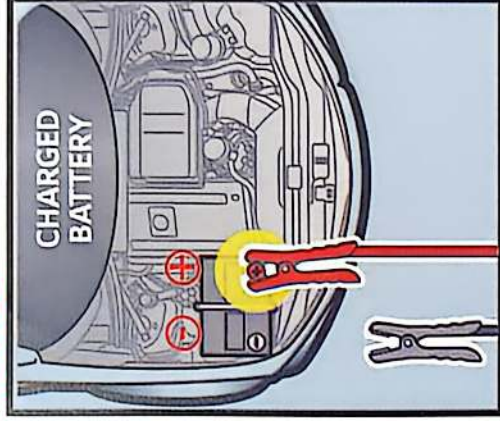

2

## Note:

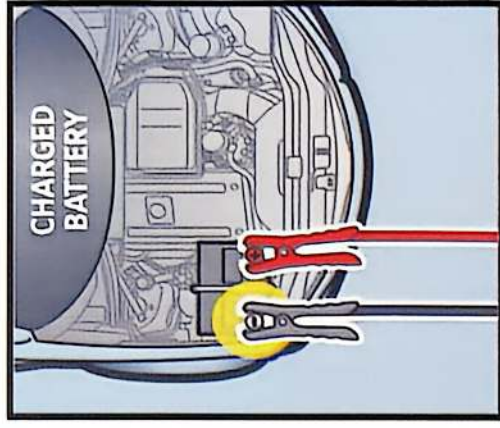

The effectiveness of the solar charger depends on temperature, sunlight intensity, and atmospheric conditions in practical applications. This charger is tailored for 12V batteries and is not suitable for use with 6V, 24V, or 36V batteries..

### Car battery connection method

1

### 12V cigarette lighter installation method

2

### NOTE:

In certain vehicle models, the cigarette lighter may not work when the ignition is switched off. In such cases, it is necessary to directly connect it to the battery terminals using the alligator battery clamps provided.
