3. When weighing. Please put the scale on a hard flat surface Do Not put it on a carpet or a soft material when using it.

Basic Characteristics

- High-precision sensor
- Weighing range: 1kg/1g, 3kg/1g, 5kg/1g, 10kg/1g **Subject to the actually purchased specifications**
- Division value: 1g
- LCD display with negative white digital
- Automatic zero point tracking
- Automatic turn-off
- Overload prompt
- Unit-conversion switch (g/kg/lb/oz/ml/milk ml)

Power Supply

This product adopts the environment-friendly design with ultra-low energy consumption. AAA battery is assembled for ex-factory. Please remove the isolated thin film of the battery after purchase and then you may use it. When the low voltage prompt appears, please replace the battery.

Operation

1. Put the loading plate (if any) on the scale body
2. Press ON button to turn on the scale
3. No loading or weighing can be done before the display resets to zero.

Unit Conversion

This product is designed with multiple units which can be converted mutually by pressing UNIT button

Turn-off & Reset manually

Press ON/OFF button for a while to turn this item off. Please press Z/T button to reset manually.

Overload Prompt

When this prompt sign appears during weighing, it means the current load exceeds the maximum weight of this product. Please take off the object immediately to avoid the damage to the scale body.

Low Voltage Prompt

When the battery is low, the left display will show (Lo) prompt. Then please replace the battery immediately.
