

USE AND CARE GUIDE

LED Lamp

Model: 14aSA-PR1800ST-W1MS-01

FCC ID: 2AB2Q14PR1800STW1MS

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. This equipment, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

WARNING: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: —Reorient or relocate the receiving antenna. —Increase the separation between the equipment and receiver. —Connect the equipment into an outlet on a circuit different from that to which the receiver is connected. —Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance of 20 cm between the radiator and your body.

Operation

- 1.) Turn power off to fixture
- 4.) Install light bulb
- 5.) Turn power on to light fixture
- 6.) After 60 seconds, light bulb will be controlled by enclosed motion sensor
 - Bulb will turn on when motion is detected.
 - Bulb will stay on for 60S after motion is not detected.
- 7.) Power must always be supplied to the fixture for the bulb to work properly

Tips for best performance:

- For best performance, install light bulb facing downwards in fixture that is 9ft. High.
- Some metal fixtures may impact motion sensor performance

Notes:

- Motion sensor detects motion within 10ft range at 120-degree angle when installed facing downwards from 9ft. height
- Recommended applications: driveway, hallway, staircase, porch, closet
- Motion sensor bulb is equipped with a microwave sensor. It may detect motion through walls.
- Please select color temperature and motion sensor setting with power off.
