3 Daily Maintenance

- Do not allow Robot and Transmitter to touch with any kind of liquid, or put it under sun exposure, severely squeezed, and dropped from high altitude.

❌ Liquid

❌ Sun Exposure

❌ Severely Squeezed

- Do not put the battery in the Transmitter when not in use. Because battery will discharge, power will slowly decrease.

- Detach the USB charger when the battery is fully charged.
- Fully charge the battery at least once every month to maintain battery health.
- DO NOT disassemble or pierce a battery in any way or it may leak, catch fire, or explode.
- DO NOT touch the electrolytes in damaged batteries, it may injure your skin or eyes.
- Discharge the Robot Batteries to 50% or lower during transport.
- Fully charge the battery before using it for the first time.

4 Environment Guidelines

- Please play with the robot on a flat and smooth ground, do not play with robots on high places, uneven, sand, grass, beds, sofas etc.

- Violent strike or trampling is strictly prohibited. Repeated strike or trampling may cause damage to the robot and oil paint may fall off.

5 Preparation Before Play

- Please make sure that the power of the robot is turned on before playing.
- Turn on the robot, then turn on the remote controller, please pair it with robot.
- Connect robot Bluetooth with your phone, make sure that the App in the phone is connected to the Bluetooth named "JT_xxxx". (Reference to the Bluetooth Guidelines)
- Remember to start motors before playing. (Detail steps, please refer to the Quick Start Guide)

6 Bluetooth Guidelines

- Open the Bluetooth settings and connect your phone to the advice, "JT_Speaker". The robot will then function as a Bluetooth speaker.

-
- Open Carle APP, connection with robot Bluetooth "JT_xxxx", please wait for about 2-10 seconds, then can control the Carle robot through App.

-
- If you still without connect to Bluetooth, please check whether the Bluetooth of your phone.

7 Problems You May Encounter

7.1 Transmitter cannot control the robot

- Check if the remote control has power.
- Can not be used under strong light.
- Need to aim at the robot head to control.
- Only be controlled at a distance of 3-5 meters without any obstructions.

7.2 Voice can not be recognized
