

# Product Instruction Manual

**Battery link cables widely used for battery bank wiring, inverter cable, grounding cable, marine boat, motorcycle, automotive, solar. Auto wiring applications and other application.**

## **Product Specification:**

- Material: resin and copper
- Current: 100A
- Line width: 5AWG /16mm<sup>2</sup>
- Length: 30cm/11.81in
- Size of the screw hole: 10mm

## **Product features:**

- Thlevel auto battery cable with Nickel-plated Copper Terminals which can offer maximum power transfer and corrosion protection.
- Widely used for battery bank wiring, inverter cable, grounding cable, marine boat Rv. Auto wiring applications.

## **Note:**

- When removing the battery cable: First remove the negative cable (black), and then remove the positive cable (red).
- When installing the battery cable: Install the positive cable (red) first, and then install the negative cable (black).

## **Package:**

- 2 x inverter battery leads
