Huawei	Mate10、Mate10 Pro、Mate20、Mate20 Pro、Mate 20X、Mate P20、Mate P20 Pro、HonorNot10、Mate P30、Mate P30 Pro
More Brands	Continuous update...
Note: Please check if the Type-C port of the phone supports audio and video signal transmission (USB 3.1).	

HDMI signal transfer

Note: For a more stable power supply, it is recommended to use our original power adapter for power.

Note: If your device's port is Lightning port, micro USB port, or not a full-featured Type-C port. You will need an adapter to connect your device to the monitor as shown below. In order to improve our customer experience, you can contact us and we will send it to you for free.

Chapter 04

Setting Up(Windows10)

Extend Mode /Duplicate Mode/Display Mode

Way1: Set on the device'Display Settings

- A: Verify that your cables are connected properly to the new monitors.
- B: Right-click anywhere on your desktop and select Display settings to open the Display page.
- C: Scroll down to Multiple displays, then select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

Note: If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

Way2: Set via Windows key + P keyboard shortcut

- A: Verify that your cables are connected properly to the new monitors.
- B: Enter the "Windows" key and "P" keyboard at the same time.
- C: select an option from the drop-down list to determine how your desktop will display across your screens. For the largest work area, select Extend desktop.

Note: If you cannot see the additional monitor(s) listed, click Detect. If does not work, try restarting your computer and do steps again.

Rotate the Screen

- 1: Verify that your cables are connected properly to the new monitors.
- 2: Right-click anywhere on your desktop and select Display settings to open the Display page.
- 3: Under the "Select and rearrange displays" section, select the monitor that you want to adjust.
- 4: Under the "Scale and layout" section, use the Orientation drop-down menu to select Landscape or Portrait screen.

Chapter 05 Screen Adjustment

On-Screen Display Menu Introduction

Pulley Button - Setting Parameters

After turning on the power, press the pulley button to enter the menu setting, image adjustment, brightness, color setting, OSD setting, reset, etc. at your own convenience

For example:

Backlight (brightness) setting

- ① Press the menu button to start installing the monitor.
- ② Scroll the menu button up and down to move to the image installation.
- ③ Press the menu button again to enter the image settings.
- ④ Scroll the menu button up and down to move to the backlight.
- ⑤ Press the menu button again to enter the backlight setting.
- ⑥ You can adjust the brightness by scrolling the menu button up and down.

You can set up other installations in the same way.

BRIGHTNESS

IMAGE

COLOR TEMP

OSD SETTING

RESET

MISC

2K 144Hz will only be shown on the monitor if the connected device supports 2K 144Hz.

SAVE SETTINGS

How to save all the settings of the monitor?

- 1.If it is an HDMI signal source, the monitor settings can be directly
- 2.If it is a TYPE C signal source, the monitor need to be connected to an external power supply first, then you can save the settings.

Chapter 06

Q&A

Important Tips:

If you find any issues with your monitor, please contact us at support@uperfectmonitor.com before returning it. We will help you solve your problem and try our best to make you satisfied. We take full responsibility for our products. If there are any defects that cannot be solved, we will refund you and you do not need to return the product.

Q: Why does my monitor not turn on?

1. Please check whether the Type-C port of your device is a full-featured Type-C port, which can support power and signal transmission. If not, please use HDMI to Mini HDMI cable to transmit video signal, and use USB-C to USB-C cable to connect external power supply.
2. This may be caused by insufficient power supply. The minimum power requirement for the monitor is 15W. Especially when you need to run the display at 2K 144Hz, the power consumption will be relatively large, it is recommended to use an external power supply, otherwise the monitor may not work properly.
3. If the above steps still cannot solve your issue, please feel free to contact us.

Q: Can't get 2K resolution or 120Hz refresh rate when connecting to Xbox series X/S?

1. Please make sure that both the device you connect and the game you play support 2K or 120Hz.
2. When the Xbox is connected to the monitor, it can auto-detect the signal source as 1440p and 120Hz.
3. If the auto-detection fails, it needs to be set manually in the Xbox, and the operation steps are as follows:
Settings >> General >> TV & Display Options >> Video Fidelity & Overscan >> Display, do not select Auto-detect, but select HDMI, return to the previous interface (TV & Display Options) after confirmation, and then you can select 1440P resolution or 120Hz refresh rate in the display.

Q: It says "no signal", what to do?

1. When connecting with a USB-C cable, make sure your device supports USB3.1./Thunderbolt 3. If not, please add a Mini HDMI to HDMI cable for signal transmission.
2. Please make sure to use the original cables.
3. Please try another device. If it still fails, please tell us for a replacement.

Q: Why does my monitor turn off when I turn up the brightness?

This is caused by insufficient power supply. Turning up the brightness will increase the power consumption, which can be solved by an external power supply.

Q: Abnormal conditions occurred - such as a splash screen, spots when using the monitor or constant restarts.

1. It is generally caused by an insufficient power supply. The monitor requires high power support. Please use the original cable included to power the monitor.
2. If you use a mobile power bank to power the monitor, please confirm whether the power of the power bank reaches 30W or more. In addition, if you need a power bank, please contact us at support@uperfectmonitor.com
3. If none of the above solutions work, please try another device. If it still failed, please contact us for a replacement.

Chapter 07

Service Support

Dear Customer,

Thank you for purchasing the Portable USB Monitor!

We offer 100% money back guarantee in 30 days and 90 days replacement, 12 month warranty for any issue, professional tech support to ensure no-worry service.
