- 2: Under the "Select and rearrange displays" section, select the monitor that you want to adjust.
- 3: Under the "Scale and layout" section, use the Orientation drop-down menu to select Landscape or Portrait screen.

Chapter 07 Q&A

Important Tips:

If you find any issues with your monitor, please contact us at support@uperfect.com before returning it. We will help you solve your problems and try our best to make you satisfied. We take full responsibility for our products.

If there are any defects that cannot be solved, we will refund or send you a replacement.

Q: Why does my monitor not turn on?

1. Please check whether the Type-C port of your device is a full-featured Type-C port, which can support power and signal transmission. If not, please use HDMI to Mini HDMI cable to transmit video signal, and use USB-C to USB-C cable to connect external power supply.
2. This may be caused by insufficient power supply. The minimum power requirement for the monitor is PD 18W. Especially when you need to run the display at 2K 120hz, the power consumption will be relatively large, it is recommended to use an external power supply, otherwise the monitor may not work properly.
3. If the above steps still cannot solve your issue, please feel free to contact us.

Q: It says "no signal", what to do?

1. When connecting with a USB-C cable, make sure your device supports USB3.1/Thunderbolt 3. If not, please add a Mini HDMI to HDMI cable for signal transmission.
2. Please make sure to use the original cables.
3. Please try another device. If it still fails, please tell us for a replacement.

Q: Why does my monitor turn off when I turn up the brightness?

This is caused by insufficient power supply. Turning up the brightness will increase the power consumption, which can be solved by an external power supply.

Q: Abnormal conditions occurred - such as a splash screen, spots when using the monitor or constant restarts.

1. It is generally caused by an insufficient power supply. The monitor require high power support. Please use the original cable included to power the monitor.
2. If you use a mobile power bank to power the monitor, please confirm whether the power of the power bank reaches 30W or more. In addition, if you need a power bank, please contact us at support@uperfect.com
3. If none of the above solutions work, please try another device. If it still failed, please contact us for a replacement.
