Secure draw string bag to vac head.

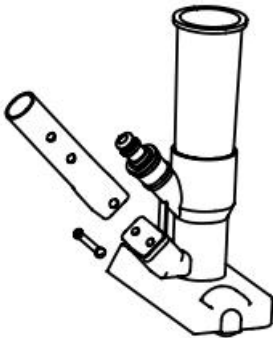

4.ATTACH HOSE:

Attach the garden hose to the hose quick-release fitting and attach it to the end piece of the vacuum cleaner.

5. TO ATTACH TELEPOLE:

If you are going to use the telepole (not included), please remove the handle connector by removing the pin. Then attach the plastic handle using a pin in the same location.

RECOMMENDED USE METHOD

The most effective method of vacuuming a pool is to use slow, easy strokes back and forth over the entire area. The water pressure from the hose passes into the vacuum head, powering its massive suction power and pulling debris and leaves into its storage bag which retains the dirt particles and allows the passage of clean water back into the pool.
