How to charge VTOMAN V8 With Wall Charger

1. Plug the wall charger into the 15V/1A input port of the device.
2. Plug the wall charger into the universal input socket (100-240V).

How To Jump Start 12V Vehicles

Firstly, plug the blue end of the jump clamps into the host of 8.

Secondly, connect the jump clamps with the car battery, red to positive (+) battery terminal and black to negative (-).

Then operate with the following instruction:

Graphic	Green Light	Red Light	Reason/Solutions
	ON	OFF	The connection is correct, ready to start your car.
	Blinking	OFF	The power of the car battery is too low or the car battery is totally dead. Press "BOOST" button, the green light will turn on then start the engine in 30 seconds.
	OFF	OFF	
	OFF	ON	The internal battery is too hot, allow the unit to cool / The V8 is at low power capacity / Please connect tightly the unit and clamps again.
	OFF	Blinking	Overcurrent protection, wait for at least 30 seconds.
	Blinking	Blinking	Temperature protection initiates, wait 10 mins resume automatically.

	<p>Red light on with Buzzer</p>	<p>Reverse the battery connections, please reconnect the poles correctly until the green light on.</p>
---	---------------------------------	--

1. Make sure all of the connections right and then start the engine.
2. Once you have started your engine, disconnect the clamps, and remove the V8.

③	Wall Charger	1	⑥	User Manual	1

E. TECHNICAL SPECIFICATIONS:

Size: 185*87*40mm

Weight: 550g

Battery Capacity: 66.6Wh

Output: 5V/9V; 5V 2.1A; 12V 10A; 12V Jumping Socket

Input: 15V 1A

Full charging time: 4.5h

Starting current: 500A(3s), 300A (5s)

Peak current:2000A

Operating temperature: -20°C ~ 60°C

F. FAQ:

1. How to turn off the device?

After using, push the "ON/OFF" Switch to OFF, The product has intelligent detection function, once there is no load, or electronic products charging is end, it will automatically shut down to save power.

2. How long will it take to full charge the device?

About 4.5 hours with the 15V/1A input.

3. How many times can this device charge the cell phone?

Take iPhone 6 as an example, this device can charge it about 7 times from 0% to 100%.

4. How many times can this device start the car when it is fully charged?

It can start car up to 30 times but we only suggest to start car up to 4 times for once use.

5. What's the lifetime of V8?

Usually 3-5years in normal condition.

6. How long does VTOMAN V8 can hold charge and still can start the car?

The design of VTOMAN V8 is very scientific, it can hold a charge up to 12 months. But we suggest to charge it every three months to extend battery service life.
